1

Description

O'Brien's Response Management Inc. (O'Brien'sRM) on behalf of the Regulatory Compliance Division is hosting a 1-day (6 hour) **Spill Prevention, Control and Countermeasure (SPCC) Regulatory Update Workshop**. With the 2009 Amendments now in effect, facilities have the opportunity to use the options proposed in 2008 and modified/finalized in November 2009. Do you know what the difference is and impact to integrity testing for onshore facilities, excluding Exploration and Production (E&P)? Do you know what a Tier I Qualified Facility is and should you take advantage of the EPA template? If you are an E&P facility, do you know the advantages and possible consequences of following the EPA criteria in lieu of sized secondary containment for separators or produced water tanks? This workshop will answer these questions and more, such as compliance and enforcement and how these changes will affect your facility. We will conclude with a question and answer discussion with the speakers and your colleagues.

2

Who Should Attend?

- Facility Health, Safety and Environmental Management Personnel
- Government Health, Safety and Environmental Management Personnel
- Exploration, Production and Transportation Operators (Offshore & Inland)
